RESPONSE TO AMENDMENT

Request for Continued Examination

1. The Request for Continued Examination (RCE) under 37 CFR 1.53 (d) filed on June 12, 2006 is acceptable and a RCE has been established. An action on the RCE follows:
2. Claims 479-482, 486-489, 491-499, 501-504, 506 and 508-543 are pending in the application, claims 1-478, 483-485, 490, 500, 505, 507 and 544 have been cancelled.
3. Amendments to the claims, filed on September 12, 2006 and October 23, 2006, have been entered in the above-identified application.

NEW REJECTIONS

4. **The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.**

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 479-482, 486-489, 491-499, 501-504, 506 and 508-543 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The concept “dry peel” or “dry release” is critical or essential to the practice of the invention, but not included in

Art Unit: 1772

the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

Applicant claims a “dry laminate” but does not claim the important concept of the “dry release” between the dry laminate sheet construction and the continuous sheet. A dry laminate can be any film, but does not necessarily convey the concept of “dry peel” or “dry release.” The specification clearly show that film layer is adhered to the facestock sheet with adhesive so that the overall dry laminate facestock construction delaminates at the film-continuous sheet interface when a user peels away the liner and not at a surface of the facestock sheet (*page 8, line 20 through page 9, line 5*). It is noted that no new matter should be add to the claims.

Potentially Allowable Subject Matter

7. Claims 479-482, 486-489, 491-499, 501-504, 506 and 508-543 are potentially allowable. It is the examiner's position that a dry laminate with an overall dry laminate facestock construction with “dry peel”, i.e. delimitation at the film-continuous sheet interface, in combination with the limitations of claim 479 would be allow. Especially in view of the discuss in the interview of October 10, 2006.

ANSWERS TO APPLICANT'S ARGUMENTS

30. Applicant's arguments in the response filed October 23, 2006 regarding the previous rejections of record have been considered but are moot due to the new grounds of rejection.
